## 1. Ready product requirements

Water solution of sodium silicates with following parameters:

- Molar ratio: 2.45 - 2.60
- Weight ratio: 2.37 - 2.52
- Density (at 20°C): 1.525 - 1.540 g/cm³
- Viscosity (at 20°C): 800 - 900 cP
- SiO₂: min 31 % w/w
- Na₂O: min 12.5 % w/w
- Insolubles: max 0.1% w/w

Clear or opalescent liquid.

Valid with polish version only.
